CLIMATESCANNER

A global initiative by Supreme Audit Institutions for assessing governments' action for climate

Assessing governmental actions to face Climate Change

A priority of

ClimateScanner

Objectives

- **Assess** national governments' climate action
- **Consolidate** data in a global overview
- **Support** decision for future works
- **Communicate** relevant information
- **Share** knowledge and experience
- Contribute to Intosai's **global voice**

ClimateScanner

Useful and feasible for all SAIs

Regular Audits

Complementary processes

Rapid review on
2 levels and 3 axes

ClimateScanner tool

Basic structure

Small number of components

Governance	Financing	Public policies
Component G1	Component F1	Component P1
Component G2	Component F2	Component P2
…	…	…
Component Gn	Component Fn	Component Pn

Monitoring
G11. MONITORING MECHANISMS

Description of component	Scale of assessment: range 0 – 3		
	Item A	Item B	Item C
This component assesses the existence of mechanisms put in place by government for monitoring the implementation of existing policies and plans, the actions carried out and the results achieved. It also assesses whether there are feedback mechanisms to inform policy-making. It addresses the supervision of the development status of policies that are more directly related to climate change – rather than a detailed monitoring of each policy. References: Open Government and Climate Change – World Bank (pages 9/10) CCIA - World Bank (elements 1.1, 2.5) Reference to Climate Change Framework Legislation – World Bank (Element 11) Framework on Sound Public Governance (OECD) (pages. 15,20) The Role of the Center of Government – IDB (pages 21/26) Guidelines for Assessing Governance of the Government Center (TCU-OECD) (pages 25/31, 43/48) Framework for Assessing Governance in Public Policies (TCU-OECD) (pages 60/62) World Public Sector Report 2021, Chapter 2 (pages 41/57) and annex (UN)	**Existence of mechanisms** There are monitoring mechanisms in place.	**Regularity** The data is fed and the monitoring is carried out regularly.	**Feedback for policy-making** There are feedback mechanisms to inform policy-making from the monitoring carried out.
	Evidence: Official reports, systems, follow-up routines, monitoring commissions, etc.	**Evidence** Check the procedures to see if data is regularly fed and monitoring regularly executed.	**Evidence** Existence of a process of feedback in policy-making after monitoring.
